### Dining Tips To Save Even More...

#### Take Advantage of Weekday Specials...

Instead of heading to your favorite restaurant on the weekend, eat out during the week when there are more specials such as Happy Hours and Kids Eat Free nights... which are typically Mondays or Tuesdays.

#### Wine At Restaurants... 500% Mark-Up

Drinks can really add to your tab, particularly if you're drinking something that is billed by the glass. Ordering wine in a restaurant can cost six times as much as drinking the same bottle at home. To keep your check as lean as possible, order water (almost always free), or opt for a beverage that comes with free refills—soda, coffee, ice tea, etc. Can't do without that alcoholic beverage? Order one glass, and then stick to water for the rest of the meal.

#### Get It "To Go"

If it's the restaurant food that you crave and not the restaurant experience, you can cut your costs by ordering your food to go. How does this save you money? By taking the sit-down experience out of the equation, you can save huge on your drink order and also avoid having to pay a tip (savings of 15% by itself).
